

TEAM 7 RACING . KARTING TEAM AND SERVICES

Has your child or even yourself shown interest in Karting or motorsport, but you have not been sure where to go, or how to get involved? Been to indoor Karting tracks but your child has not been old enough or tall enough to take part? This is the problem most parents have, as they do not realise that a child can start Karting from the age of 5 years old.

The sport is becoming more popular for 5-8 years of age, in the class called 'Bambino'. There are a number of track around the midlands areas that offer none race day testing, none MSA timed trials and MSA Racing from 6 years old. The children use a race Kart with a 50CC engine.

The next age group is Cadets aged between 8-13 years (pictured below). Junior aged between 13-16 years and senior 16 years plus.

This sport does not have to be expensive and is a great team sport to get children in to. Learning the craft of karting, driver skills, team work, concentration and focus really does pay dividend to their character growing up.
